

Trim Die Designer

Job Summary

Develops a Trim Die/By-Pass Shear Die design which meets the design criteria of the customer by using the customer's initial design or press specifications within the cost, timing and quality objectives.

Major Duties:

- Develops pre-design from information provided by the customer and may be required to develop a number of concepts to achieve a final design direction.
- Investigates and procures all data required to develop designs and uses best combination of preliminary information and contributing data to develop final designs.
- Develops complete design, which includes layouts with background information, detail drawings, and geometric dimensioning and tolerancing in accordance with customer and technical requirements.
- Makes changes to current product.
- Uses understanding of stackups, gaps/margins, and master sections, and formats them in a manner that meets the requirements of engineering.
- Prepares all sketches and/or schematic diagrams.
- Transfers data per company process and keeps the part file folder up to date.
- Develops and conducts any specific feasibility studies needed to address particular issues.
- Ensures the integrity of all design information communicated on assigned programs.
- General knowledge of Acoustic Materials.
- Other duties as assigned

Qualifications:

- Diploma or degree in related field
- Minimum 3 years with NX 9.0 & Solidworks
- GDT (geometric Dimensioning and tolerancing)

Address:
469 Silver Creek Industrial
Drive
Lakeshore, Ontario, Canada
